

Chapter XXVI: FACULTY SURVEY DATA

This chapter contains the 1998 Faculty Survey data. It gives the results for Truman and then gives averages for 4 year private colleges, nonsectarian 4 year colleges, public 4 year colleges, and all 4 year institutions.

Please note that on the first set of comparisons there is a mistake. On page XXVI-20, the question that reads “How much of your publishing or other scholarly work is conducted:/By you alone/With one other person/With two or more people.”

The response options for each of the three items are arranged as follows:

all
most
some
none

In fact, this is the reverse of what they should read. The proper order is:

none
some
most
all

Please note that the actual results in all three sections of that question are in the proper order. It is only the item stems that are reversed.
