

Chapter 2: NATIONAL SURVEY OF STUDENT ENGAGEMENT (NSSE)

Who takes it?

All freshmen and seniors are requested to complete the survey. In 2012, Truman participated in the NSSE 2.0 pilot so half of our students were asked to complete the NSSE and the other half were asked to complete the NSSE 2.0 pilot. The pilot results are unavailable for public distribution.

When is it administered?

In the Spring.

How long does it take for the students to complete the instrument?

15 minutes.

What office administers it?

NSSE personnel administer it online with campus coordination by the Provost's Office.

Who originates this survey?

National Survey of Student Engagement

Center for Postsecondary Research

Indiana University Bloomington

1900 East Tenth Street

Eigenmann Hall Suite 419

Bloomington, IN 47406-7512

(812) 856-5824

<http://nsse.iub.edu>;

e-mail: nsse@indiana.edu

When are results typically available?

Late summer.

What type of information is sought?

NSSE attempts to measure levels of student engagement. Spring 2012 NSSE participants answered questions in five sections: level of academic challenge, active and collaborative learning, student-faculty interactions, enriching educational experiences, and supportive campus environment. A copy of the survey is available at

http://nsse.iub.edu/pdf/survey_instruments/2012/NSSE2012_US_English_Web.pdf.

From whom are the results available?

The Provost's Office.

To whom are the results regularly distributed?

The University community through a website, the University Conference, Undergraduate Council, the summer Strategic Planning and Assessment Workshop, and through this *Almanac*.

Are the results available by department or discipline?

No.

Are the results comparable to data of other universities?

Yes.

Selected NSSE 2012 Results and Interpretation

Assembled by Marty Eisenberg

October 2012

With the 2012 administration, NSSE allowed us to choose our comparison groups. Our comparison groups were

1. COPLAC Schools
2. Private National Liberal Arts College. These were schools identified by *US News and World Report* as being national liberal arts colleges who administered NSSE in 2012. Seventy-five schools met this definition. The group includes a wide variety of schools with differing amounts of resources.
3. NSSE 2012. The 545 schools that administered NSSE in 2012.

Our sample size was smaller in 2012 because we also participated in the pilot for NSSE 2.0. Half of our students completed the traditional NSSE and half completed the pilot for NSSE 2.0.

Some observations

- In comparison with private national liberal arts colleges, first-year Truman students report less academic challenge, less student-faculty interaction and similar enriching-educational experiences and supportive campus environment. Truman freshmen report more similar experiences with private national liberal arts colleges in 2012 than they did in 2010.
- In comparison with private national liberal arts colleges, senior Truman students report less academic challenge, student-faculty interaction, and a similar supportive campus environment. They report more enriching education experiences. Looking at the 2010 results, the 2012 responses suggest that the Truman experience for seniors is becoming less similar to the experience at private national liberal arts colleges.
- In comparison with COPLAC schools, both freshmen and seniors report more academic challenge, more active and collaborative learning, more student-faculty interaction, more enriching educational experiences, and a more supportive campus environment.

Truman students report

- Spending more time preparing for class
- Spending more time on co-curricular activities
- About the same time relaxing and socializing

- Spending more time working for pay on campus (seniors)
- Spending less time working for pay off-campus
- Having fewer assigned readings compared to private national liberal arts colleges
- Writing fewer papers over 5 pages compared to private national liberal arts colleges
- More volunteer work or community service
- More foreign language
- More study abroad than COPLAC and NSSE schools (seniors)
- More serious conversations with students of a different race or ethnicity
- Fewer self reported gains in developing a personal code of ethics
- About the same amount of memorizing facts, ideas, or methods from your courses and readings so you can repeat them in pretty much the same form

Summary Table

		Truman Compared to		
		COPLAC	Priv Nat'l Lib Arts	NSSE 2010
Level of Academic Challenge	FY	More	Less	Similar
	SR	More	Less	More
Active and Collaborative Learning	FY	More	Similar	More
	SR	More	Similar	More
Student-Faculty Interaction	FY	More	Less	Similar
	SR	More	Less	More
Enriching Educational Experiences	FY	More	Similar	More
	SR	More	Less	More
Supportive Campus Environment	FY	More	Similar	More
	SR	More	Less	More

The table tells us that Truman provides more academic challenge for freshmen compared to COPLAC schools and less academic challenge than private national liberal arts schools. See the more detailed tables for the questions that make up these categories.

These more detailed tables are followed by reports designed to allow meaningful comparisons to other institutions, across units of the university, and for critical thinking over time.

Level of Academic Challenge

^a All statistics are weighted by gender and enrollment status. Comparison group statistics are also weighted by institutional size.

^b The 95% confidence interval for the population mean is equal to the sample mean plus/minus 1.96 times the standard error of the mean.

^c A measure of the amount individual scores deviate from the mean of all the scores in the distribution.

^d Degrees of freedom used to compute the t-tests. Values differ from the total Ns due to weighting and whether equal variances were assumed.

^e Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

^f Effect size is calculated by subtracting the comparison group mean from the school mean, then dividing the result by the pooled standard deviation.

^a All statistics are weighted by gender and enrollment status. Comparison group statistics are also weighted by institutional size.

^b The 95% confidence interval for the population mean is equal to the sample mean plus/minus 1.96 times the standard error of the mean.

^c A measure of the amount individual scores deviate from the mean of all the scores in the distribution.

^d Degrees of freedom used to compute the t-tests. Values differ from the total Ns due to weighting and whether equal variances were assumed.

^e Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

^f Effect size is calculated by subtracting the comparison group mean from the school mean, then dividing the result by the pooled standard deviation.

IPEDS: 178615

^a All statistics are weighted by gender and enrollment status. Comparison group statistics are also weighted by institutional size.

^b The 95% confidence interval for the population mean is equal to the sample mean plus/minus 1.96 times the standard error of the mean.

^c A measure of the amount individual scores deviate from the mean of all the scores in the distribution.

^d Degrees of freedom used to compute the t-tests. Values differ from the total Ns due to weighting and whether equal variance were assumed.

^e Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

^f Effect size is calculated by subtracting the comparison group mean from the school mean, then dividing the result by the pooled standard deviation.

^g Response set is categorical.

Frequency Distributions

August 2012

Interpreting the Frequency Distributions Report

Variables

The items from the NSSE survey appear in the left column in the same order and wording as they appear on the instrument.

Benchmark

Items that make up the five “Benchmarks of Effective Educational Practice” are indicated by the following:

LAC=Level of Academic Challenge

ACL=Active and Collaborative Learning

SFI=Student-Faculty Interaction

EEE=Enriching Educational

Experiences

SCE=Supportive Campus

Environment

Variable Names

The name of each variable appears in the first column for easy reference to your raw data file and the *Mean Comparisons* report.

Weighting

Weights adjusting for gender and enrollment status (and by institutional size for comparison groups) are applied to the percentage column (%) of this report. Weights are computed separately for first-year students and seniors. Weighted results present a more accurate representation of your institution and comparison group students. *Only the column percents are weighted. The count is the actual number of respondents. Because the counts are unweighted and the column percentages are weighted, one cannot replicate column percentages from counts.* Additional details about weighting can be found on the NSSE Web site. nsse.iub.edu/links/institutional_reporting

Sample

The *Frequency Distributions* report is based on information from all randomly selected or census-administered students for both your institution and your comparison institutions. Targeted and locally administered oversamples and other non-randomly selected students are not included.

Class

Frequency distributions are reported separately for first-year students and seniors. Institution-reported class ranks are used.

Response Options

Response options are listed as they appear on the instrument.

Column Percentage (%)

This column presents the *weighted* percentage of students responding to the particular option in each question.

Count

The Count column represents the actual number of students who responded to the particular option in each question. *Counts are unweighted.*
