

Chapter 5: PORTFOLIO ASSESSMENT: (Data Tables Only)

Portfolio Assessment

Who takes it?

All students must develop and submit a portfolio as a requirement for graduation. In academic year 2014-2015, 1167 students submitted portfolios.

When is it administered?

Most students complete the process as part of their capstone experience, so students usually submit portfolios during their senior year. Some submit earlier, while others have actually completed their Truman course work and submit after they have finished their time on campus. Since it is a graduation requirement, students who do not submit their portfolio are subject to transcript/diploma/verification holds. Our new online portfolio submission system went online in August 2011, and it is specifically designed to allow students to store potential portfolio elements throughout their college career. Regardless of when students submit the portfolio, the work itself may have been completed at any time during their college career.

How long does it take for the student to compile the portfolio?

The average for the 2015 academic year is four and a half hours, including time to retrieve and upload previously written files. This is up a half hour from last year (2014), which in turn was up a half hour from the year before (2013). Prior to that, the average had held steady for several years.

What office administers it?

The portfolio project director administers portfolio collection in conjunction with each discipline/program. The portfolio project director also leads the faculty and staff readers who evaluate and score the portfolios. These readers work in groups of approximately twenty and also participate in faculty development and campus discussion.

Who originates the submission requirements for portfolios?

The Assessment Committee evaluates requests for specific portfolio items, led by the Portfolio director working with faculty assessors and the Portfolio Committee (a standing subcommittee of the Assessment Committee)

When are results typically available?

The portfolios are read and scored in May and August. The results are usually available late in the fall or early in spring of the following year.

What type of information is sought?

Faculty evaluators and the Assessment Committee designate the types of works requested from students, but many of the requested items have remained constant for multiple years. In the 2014-2015 academic year, a portfolio included works demonstrating 1) *critical thinking and writing*, 2) *interdisciplinary thinking*, 3) *civic engagement*, and 4) *quantitative reasoning*. The portfolio also included a work or experience the student considered 5) *most personally satisfying*, and 6) *a Letter to Truman* in which students give summary thoughts about their experience with the Portfolio and at Truman. Other items may be included, but these are evaluated separately, if at all, including a 7) *transformative learning experience questionnaire*.

From whom are the results available?

The director of the portfolio project can release datasets or additional analyses upon request.

Are the results available by school or department?

Yes.

To whom are results regularly distributed?

Overall results of portfolio assessment are available to the Truman community through this [Assessment Almanac](#). Occasional reports are given to governance, planning workshops, and other forums. Some departments use the information to reform their curriculum, improve programs, and engage in self-study. Faculty who participate in reading sessions report changing their assignments and their teaching techniques based on their experience.

Are the results comparable to data of other universities?

No. While some universities are using portfolios for assessment of general education or liberal studies, most do not use similar prompts or submission categories.

2015 Truman Portfolio Data Tables ONLY

In order to distribute the Portfolio data as quickly as possible to interested parties, tables of the data for each of the prompts from 2014-2015 are given here. Analysis and discussion will be added at a later date.

2015 Portfolio Contents

- Critical Thinking and Writing
- Interdisciplinary Thinking
- Civic Engagement
- Quantitative Reasoning
- Most Personally Satisfying Experience
- Letter to Truman
- Transformative Experiences Questionnaire
